readiness

IPCS Global — Since 2008

IPCS Global began in 2008 as a specialised industrial automation training and services provider and has grown into one of India's leading technical and digital skills institutes, with 50+ branches across India and the GCC. Our Coimbatore centre in Peelamedu combines classroom teaching with hands-on labs, and every learner is coached in communication, aptitude and interview readiness alongside technical skills.

About the IT, AI & Software Development Stream

From AI and data science to full stack development and QA automation, our IT programmes are built around real projects and portfolios — so you graduate able to show employers what you can build, not just what you studied.

**ISO 9001:2015 Certified**

Audited, consistent training quality.

**TÜV SÜD Cooperation Partner**

Partner of the German testing & certification body.

**NSDC Approved Partner**

Approved training partner under Skill India.

Inside the IPCS Global Coimbatore training centre.

Why IT, AI & Software Development, **Why Now**

The demand behind this programme — and the industries that hire our graduates.

- 1 Software runs every business**
Banks, hospitals, retailers and startups all need web applications, data pipelines and quality assurance — creating steady demand for skilled developers and analysts.
- 2 AI and data are the new core**
Companies are investing heavily in AI, analytics and automation. Candidates who can build with data and AI stand out immediately.
- 3 Skills beat degrees**
IT hiring increasingly tests what you can build. A strong project portfolio and GitHub profile can open doors regardless of your academic background.

Where You Can Work

- 1 IT services & consulting**
- 2 Product companies & SaaS**
- 3 Startups**
- 4 Banking, finance & insurance (BFSI)**
- 5 Healthcare & e-commerce**
- 6 Global capability centres (GCCs)**

Three Ways to Build Your Career

Full-Time Job

Join a company with placement support behind you — stability and structured growth.

Job + Freelance

Hold a job while taking side projects to build income and a broader portfolio.

Remote & Global

IT skills are the most globally portable: remote roles, freelance projects and overseas opportunities (GCC, Europe, US, Singapore) are all realistic with experience and a strong portfolio.

FAST-TRACK PROGRAMME

Python Full Stack Developer

HTML, CSS, JavaScript, MySQL, Python and Django – build and deploy real web apps in three months.

3 Months

240 Hours

CERTIFICATION

TÜV SÜD + IPCS Global

Who Should Join

- ✓ Students & fresh graduates
- ✓ Career switchers
- ✓ Developers adding Python

Eligibility: 12th pass or above with basic computer knowledge.

What You'll Be Able To Do

- ✓ Build web pages with HTML, CSS & JavaScript
- ✓ Write Python programs
- ✓ Build Django applications
- ✓ Deploy a Django project

The Full Syllabus

9 modules, 240 hours.

01	HTML	10 Hrs
02	CSS	10 Hrs
03	JavaScript & jQuery	10 Hrs
04	MySQL	10 Hrs
05	Python Fundamentals	30 Hrs
06	Django Framework: Views, Forms & Templates	55 Hrs
07	Django Models & Advanced Features	50 Hrs
08	Deploying Django	25 Hrs
09	Project	40 Hrs

Total Training Duration

240 Hours

Module-by-Module Topics

MODULE 01 HTML • HTML5 semantic markup & forms	MODULE 02 CSS • CSS3, Flexbox, Grid & responsive design
MODULE 03 JavaScript & jQuery • JavaScript & ES6 fundamentals • DOM manipulation & jQuery basics	MODULE 04 MySQL • Relational databases & normalisation • SELECT, JOINS & aggregations

MODULE 05

30 Hrs

Python Fundamentals

- Getting started
- Data handling & strings
- Lists, tuples & dictionaries
- Operators & control flow
- Functions

MODULE 06

55 Hrs

Django Framework: Views, Forms & Templates

- Django admin
- Handling HTTP requests
- Forms & templates
- Function & class-based views

MODULE 07

50 Hrs

Django Models & Advanced Features

- Models & migrations
- Authentication & security
- Caching, pagination & logging
- Signals, i18n & async support
- Testing & performance

MODULE 08

25 Hrs

Deploying Django

- Server setup
- Static files & databases
- Production settings

MODULE 09

40 Hrs

Project

- Full Django application

Python Full Stack Developer · Part A**Tools, Projects & Assessment****■ Tools & Technologies You'll Use**

VS Code

Python

Django

MySQL

Git & GitHub

Postman

■ Projects You'll Build

1

Personal website

2

Django blog with authentication

3

Deployed project

■ How You'll Be Assessed

1

Module Assessments

Practical and theory checks at the end of each module.

2

Project Reviews

Trainer review of your mini projects and final project.

3

Certification

Issued on meeting assessment and attendance criteria.

Certification: TÜV SÜD certification + IPCS Global course certificate + Internship Certification.

PART B · CAREER GROWTH

Where Python Full Stack Developer Can Take You

Job roles, a realistic growth ladder with salary ranges, and the skills to keep growing.

■ Roles You'll Be Ready For

1

Python Full Stack Developer

Builds complete web applications.

2

Django Developer

Builds backends and APIs in Django.

3

Backend Developer

Designs APIs and databases.

4

React Frontend Developer

Builds modern user interfaces.

5

API Developer

Builds and integrates REST APIs.

6

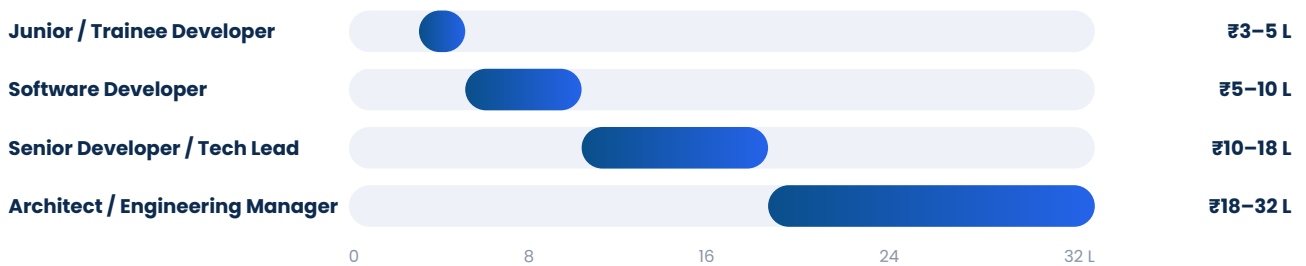

Software Engineer

Develops and maintains software products.

■ Your Growth Ladder

STAGE 01 0-2 YRS	Junior / Trainee Developer Build features and fix bugs.	₹3 – 5 LPA
STAGE 02 2-5 YRS	Software Developer Own modules and APIs.	₹5 – 10 LPA
STAGE 03 5-8 YRS	Senior Developer / Tech Lead Design systems and lead teams.	₹10 – 18 LPA
STAGE 04 8+ YRS	Architect / Engineering Manager Own architecture and delivery.	₹18 – 32 LPA

■ Annual Salary Range (CTC) — ₹ Lakh per annum

Indicative ranges for India in 2026. Lower end: Tier-2 cities such as Coimbatore and smaller firms; upper end: metros and larger companies. Guidance only, not a salary guarantee.

■ Skills to Add Next

- ✓ Docker & Kubernetes
- ✓ System design
- ✓ Cloud (AWS) in depth
- ✓ AI integration in apps
- ✓ Testing & CI/CD

■ Certifications to Target

- ✓ TÜV SÜD certification
- ✓ AWS Certified Developer – Associate
- ✓ PCEP / PCAP Python certifications
- ✓ Meta Front-End / Back-End certificates

■ Upgrade Path at IPCS Global

1 **Advanced Python Full Stack Developer (6 months)**

2 **Certified AI Professional**

■ Your First 12 Months After the Course

1

Month 0–1 • Get Visible

Polish your resume and portfolio; apply through the IPCS placement cell's drives.

2

Month 1–3 • First Role

Join as a Junior / Trainee Developer.

3

Month 3–6 • Get Certified

Earn one certification from the list above.

4

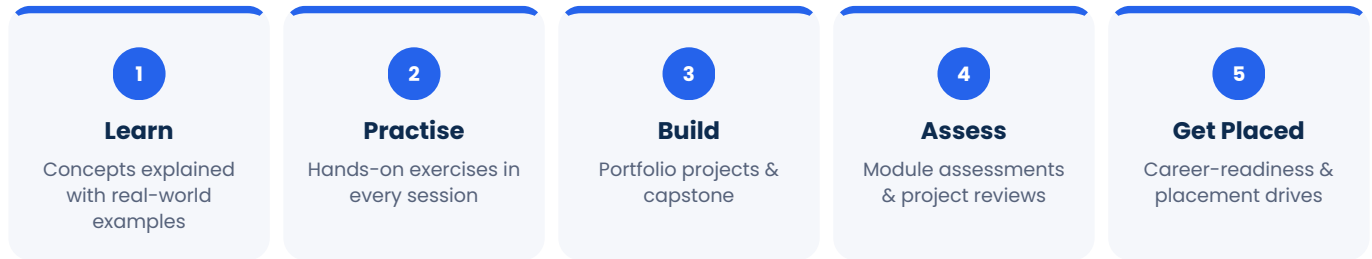

Month 6–12 • Specialise

Pick a specialisation and own a project, system or channel.

How We Train & Certify

Technical skill gets you noticed — presentation, confidence and communication get you hired. Career-readiness runs alongside the syllabus, not after it.

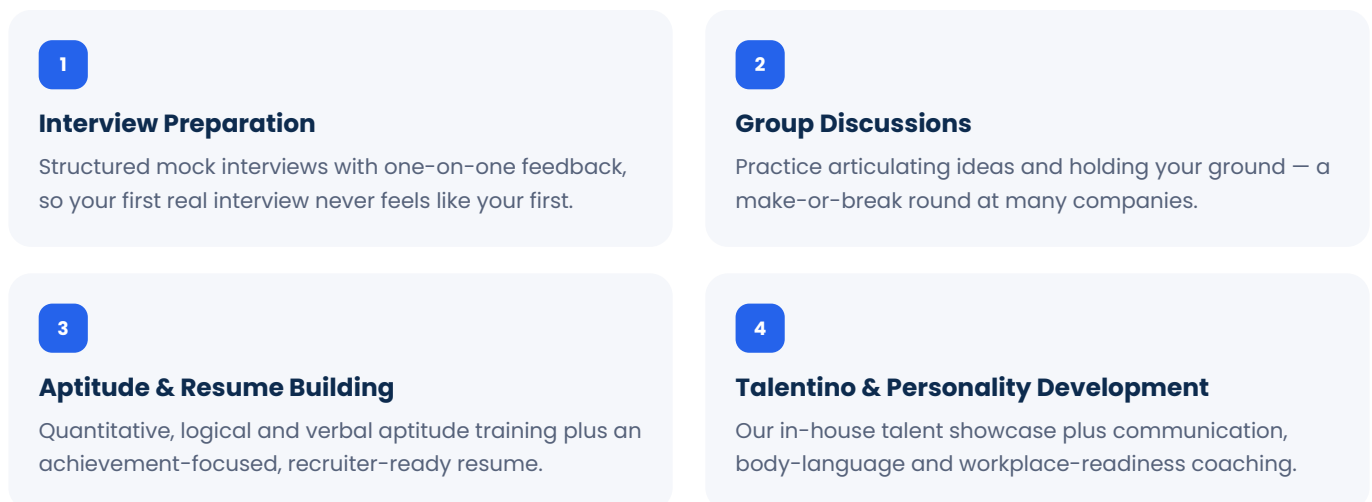

Our Learning Method

Your Certifications

- TÜV SÜD Certification**
 IPCS Global is a cooperation partner of TÜV SÜD, the German testing and certification body. Eligible learners receive a TÜV SÜD certificate that adds independent, international credibility to their skills.
- IPCS Global Course Certificate**
 IPCS Global is an ISO 9001:2015 certified institute and an NSDC approved training partner. Your certificate is issued on successful completion of assessments and projects.
- Internship Certification**
 Documents your real-world projects and GitHub portfolio work — verifiable experience for your resume.

Career-Readiness Track

How IPCS Global Gets You Hired

Every learner goes through a structured career-readiness track alongside the course, supported by our dedicated placement cell.

1

Dedicated Placement Cell

Interview drives, industry referrals and follow-up until you are placed – not just until the course ends.

2

Resume & Portfolio

One-on-one sessions to build a recruiter-ready resume and a project portfolio that proves your skills.

3

Aptitude & GD Training

Quantitative, logical and verbal aptitude plus group discussion practice.

4

Mock Interviews

Simulated technical and HR panels so the first real interview never feels like the first.

Recent IPCS Coimbatore Placements

A selection of recent placements across IPCS Global Coimbatore programmes.

Global opportunity: IT skills are the most globally portable: remote roles, freelance projects and overseas opportunities (GCC, Europe, US, Singapore) are all realistic with experience and a strong portfolio.

Why IPCS Global

18+ Years of Training Excellence

A track record since 2008, refined across 15,000+ professionals trained.

ISO 9001:2015 Certified

Audited, consistent training quality — every batch, every time.

Recognised Partnerships

TÜV SÜD cooperation partner and NSDC approved training partner.

Dedicated Placement Cell

Industry tie-ups, interview drives and follow-up until you are placed.

Real Labs, Real Projects

Industry-grade equipment and live projects — proof of work, not just a certificate.

50+ Branches, One Standard

Across India and the GCC, with weekday, weekend and fast-track batches.

Meet Our Coimbatore Team

Trainers, mentors, counsellors and placement coordinators at IPCS Global Coimbatore — working with every learner from the first class to final placement.

Frequently Asked Questions

Quick answers to the questions learners and parents ask us most. For anything else, call or visit the Coimbatore branch.

Q. Do I need prior experience to join?

Most programmes start from the fundamentals. Each programme lists its eligibility — our counsellors will confirm the right starting point for your background.

Q. Are classes held online or in the classroom?

Classroom / Online / Hybrid. Talk to our counsellors about the best option for your programme.

Q. What batch timings are available?

We run weekday, weekend and fast-track batches, so students and working professionals can both find a schedule that fits.

Q. Is placement guaranteed?

We provide 100% placement assistance — resume building, aptitude and GD training, mock interviews and interview drives through our dedicated placement cell. Final selection depends on each learner's performance, attendance and interview results.

Q. What certificate will I receive?

TÜV SÜD certification + IPCS Global course certificate + Internship Certification.

Q. Can I attend a class before enrolling?

Yes. Book a free demo session to meet the trainers, see the labs and experience a live class before you decide.

Q. What are the course fees?

Fees depend on the programme and batch type. Please contact the Coimbatore branch for the current fee structure and any available offers.

Q. Can working professionals join?

Yes. Weekend and fast-track batches are designed for people who are working or studying alongside the course.
